

iGlobal Services — AI Generalist Career Program

“ Learn to build, automate, and innovate with AI — no coding degree required. ”

www.iglobal.services | support@iglobal.services

Program Duration: 6 – 8 weeks (Weekend or Evening Cohorts)

Format: Live + Guided Projects + Mentorship

Level: Beginner → Advanced (Career Accelerator)

Mode: Online, Global Access

Program Overview

The AI Generalist Career Program by iGlobal Services is designed for ambitious professionals who want to go beyond AI theory — and actually build practical, portfolio-ready AI projects that employers value. This hands-on program bridges business context, technical understanding, and creative application — turning learners into AI generalists capable of deploying automation, data, and intelligence solutions in any domain.

Join professionals across 15+ countries who 've accelerated their careers with iGlobal.

Program Structure

Live Cohort Sessions · Project-Based Learning · Mentor Hours · Career Support · Community Access

Curriculum Breakdown

Each module is designed around real-world use cases, guided labs, and deployable projects.

Module 1 — Foundations of AI Fluency — Understanding AI, ML, LLM fundamentals, AI vs Automation, Prompting, ethical AI use, and your first AI workflow.

Module 2 — No-Code AI Tools & Automation — Setup Zapier / Make workflows, Google Workspace automation, real project: Automated Lead Bot.

Module 3 — Applied Data & Analytics — Data cleaning with AI, dashboards, vector databases, project: Smart Dashboard.

Module 4 — Generative AI & RAG Systems — Build internal Q&A; assistants with guardrails and prompt flows.

Module 5 — Deployment & Integration — Integrate AI with websites, CRMs, APIs. Project: End-to-End AI Assistant.

Module 6 — Portfolio, Career, and Capstone — Portfolio storytelling, mock interviews, and final project presentation.

Tools & Platforms Covered

Category	Tools / Platforms
